

t-SNE of the object co-occurrence graph encoder — GraphSAGE vs GAT

1,068 object nodes, identical recipe (1000 ep, $\tau=0.5$, lr=1e-3, 2 layers) and corpus — backbone is the only difference. Room label is a weak diagnostic (anchor-word rule), not ground truth.

GraphSAGE

test AUC 0.789

GAT

test AUC 0.810

● Bathroom ● Bedroom ● Kitchen ● Living room ● Dining room ● Unlabelled (diagnostic gap)
